The Temple: Its Ministry and Services **SAVE \$9**
Alfred Edersheim

Jerusalem's temple represented not only the glory of Israel's past, but also the splendor of its future when the Messiah would come and reign over God's people. Edersheim captures the essence of the temple's significance, both in the life of Israel and in the life and theology of the early Christians.

You'll be certain you can actually see the grandeur of Herod's temple—the place that Jesus "cleansed," or that you can feel the anguish of a sacred place of worship trodden by Roman soldiers. This newly typeset, easy-to-read edition captivates Edersheim's knowledge and passion for the temple of Scripture. 332 pages, hardcover from Hendrickson.

Matthew Poole's Commentary

For devotional excellence, this commentary is perhaps the only clear rival to Matthew Henry. Charles H. Spurgeon said of Poole's commentary, "The three volumes... are necessities for your libraries. On the whole, if I must have only one commentary, and had read Matthew Henry as I have, I do not know but what I should choose Poole. He is a very prudent and judicious commentator... not so pithy and witty by far as Matthew Henry, but he is perhaps more accurate, less a commentator, and more an expositor." Three hardcover volumes from Hendrickson.

Each figure includes the pronunciation and etymology, as well as passages of Scripture in which it appears, and a full explanation. Nearly 8,000 passages are cited; helpful indexes. "The best handbook on figures of speech." —Walter C. Kaiser, Jr. 1104 pages, hardcover from Baker.

The New Park Street Pulpit, 6 Vols.

C.H. Spurgeon
In 1854, at the age of 20, Charles Spurgeon accepted the pastorate of the New Park Street Baptist Chapel in London. It was only five years after his conversion. Yet his sermons, recorded

by two of his hearers and collected in this series, reflect his considerable gifts even then: memorable word pictures, pointed applications, persuasive concern for people, and above all a heart for God. Preachers will find Spurgeon's early sermons to be excellent models, and lay fans will enjoy them as devotional reading. Reprinted by Baker in six hardcover volumes.

Young's Literal Translation of the Holy Bible

When a host of contemporary Bible versions and paraphrases offer conflicting verbal images to readers, Young's comes to the rescue. Robert Young (compiler of the equally useful concordance) carefully produced a literal English rendering of the original languages. It enables students to appreciate the translator's art, assess modern translations, and attempt to construct their own translation. 765 pages, softcover from Baker.

This interpretation of God's Word remains completely faithful to the original biblical languages, but is written in everyday English that's easy to understand. Hardcover from World.

God in Three Persons: A Contemporary Interpretation of the Trinity

SAVE \$10

Millard J. Erickson
The Trinity is the least understood, yet the most important concept in the church, says Erickson. And in the tradition of *The Word Became Flesh*, he answers critics who say the doctrine is unnecessary baggage to the gospel. Drawing on key teachings from John's Gospel, he defends the significance of a trinitarian doctrine and explains it in understandable terms. He also considers whether belief in the Trinity is requisite to salvation and whether it makes any difference in the Christian worldview. 352 pages, hardcover from Baker.

Faith Works: The Gospel According to the Apostles
John R. MacArthur, Jr.
In his last blockbuster, *The Gospel According to Jesus*, MacArthur challenged modern "easy-believism" in the light of Jesus' own sayings. Now he takes an even closer look at the style and content of contemporary evangelism. Using as his yardstick the Gospel message presented by Peter, James, and John, MacArthur shows how many churches are falling far short of the biblical model of proclaiming Christ's lordship. Another controversial blockbuster for MacArthur? Read for yourself! Hardcover from Word.

Safety/Handicap Accessible Surfacing

PROMOTE SAFETY AND HELP PREVENT INJURIES

It's not easy being responsible for the safety of a play yard — but, with the right surface, you can greatly reduce the threat of accidents. One of the most effective ways to accomplish this goal is by installing proper surfacing under playground equipment. Our "EZ FALL 7" offers excellent protection against serious head injuries. Each tile is 1¾" thick and meets or exceeds every current requirement stipulated by the Consumer Product Safety Commission, The National Bureau of Standards, and the American Society for Testing and Materials for falls from a seven foot height.

Showing a typical installation under a piece of playground equipment.

HANDICAP ACCESSIBLE

"EZ FALL 7" tiles join uniformly to form a flat, unbroken surface that is a perfect base for wheelchairs. In addition, each border and corner tile has a full 6-inch beveled edge to create a trip-free transition from the play yard to the safety pad. Our surface exceeds all ADA, Handicap Accessibility requirements.

MAINTENANCE-FREE/LONG LASTING, DURABLE CONSTRUCTION

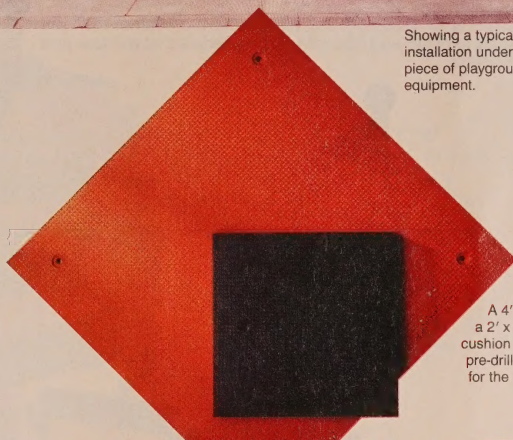

The safety matting is constructed of 100% top grade EPDM non-toxic rubber compounds. The rubber compounds are molded under high compression into solid one-piece blocks with waffle constructed under sides. This process makes our mat a highly dense and intensely durable product that resists wear, weather, cutting, and puncture. The product also allows water to drain freely over and under to give you the best possible drainage. The matting's texture provides a slip-resistant surface that meets all requirements specified in ASTM E303. Our "EZ FALL 7" matting also provides you with the best fire rating in the industry when tested in accordance with ASTM E648, the most strict and stringent flame spread test in the industry.

EASY INSTALLATION

"EZ FALL 7" safety matting can be applied over any cement or asphalt sub-surface of virtually any shape. Lay the mats out in the desired configuration, drill holes, and secure the rubberized anchors with cement or epoxy into the asphalt or concrete. The simple design of this safety matting allows for quick and easy installation. In this non-interlocking system, the mats butt up against each other and are then individually secured to the ground with anchors. The system is available in 2' x 2' or 4' x 4' center blocks and the tapered edge pieces are 1' x 2' with a beveled edge to make the mat handicap accessible and "trip free." If your maintenance staff prefers, in most areas we can provide you with the name of a company for installation.

HOW TO ORDER

Our modular mats can virtually fit any shape without waste. Send dimensions of your rectangular or square shaped area. If the area is another shape other than square or rectangle, send a sketch of the area with dimensions. It is best if your dimensions are divisible by two feet. Please indicate if you need a tapered edge around your pad and the running feet needed around all borders. The safety mat is available in Black at approximately \$9.00*† per square foot and Terra-cotta at approximately \$10.00*† per square foot. When we receive your color preference, and the dimensions of the area you wish protected, we will quote you a firm, delivered price for your specific design.

"EZ FALL 7"'s modular design allows free-form designs.

FirstPlay[®] For Infants and Toddlers

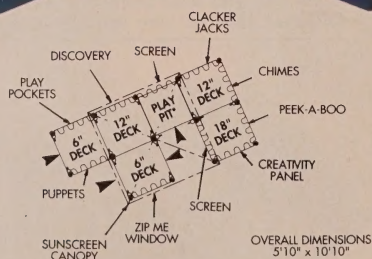

This unique, first modular play system meets the developmental needs of infants and toddlers. The units have age-appropriate activities to build both gross and fine motor skills and meet the accessibility goals of the ADA. The two-sided activity skill panels are designed to promote eye-hand coordination, parallel play and socialization. The materials and colors were chosen to develop visual and tactile senses. The scale encourages climbing and reaching and provides new adventures for young children.

Designed for indoor or outdoor use, all surfaces are weather-resistant and are easy to clean and maintain with materials that are tear and mildew resistant.

The platforms and posts are covered with "Fantastic Foam"—a durable foam encased in a tough outer "skin." It has been successfully used for many years at amusement parks to cover the seats of rides.

The powder-coated, galvanized steel tubing will resist rust and corrosion.

But, best of all, no tools are needed for assembly and because the units sit on the ground, expensive, permanent installation is not needed.

For the sake of accuracy, we prefer that you mail in or FAX orders for playground equipment. However, if you do FAX or phone in your order, any mailed in confirmation must be clearly marked "CONFIRMING ORDER;" to avoid duplication. **Where color choices are available, please specify color(s).**

Do **NOT** return damaged goods to us without prior authorization. **There will be a restocking charge on all returned items.**

GUARANTEE: On playground equipment, Constructive Playthings guarantees all materials and workmanship for one year after date of invoice (excluding vandalism and abnormal use). Some parts have extended warranties:

LIFETIME WARRANTY ON ALMAG 35® clamps. 25 Yrs. on PlayPals®, castings, springs, and Explorer® post caps. **15 Yrs.** on Explorer® posts and pressure-treated Pine. **10 Yrs.** on expanded metal decks, Redwood, rails, loops, and rungs on modular systems. **5 Yrs.** on plastic components, FirstPlay® fabric panels, foam, and steel. The pine and redwood warranties are against deterioration which impairs structural integrity and excludes damage due to checking and warping which is a natural tendency of wood.

SHIPPING CHARGES:

All prices are F.O.B. our factory in New Berlin, Pa. **ACTUAL** shipping charges will be added to your invoice. Shipping charges are hard to estimate as they depend on distance shipped, and the weight/cube of the particular shipment. As a general rule, charges run 15¢ to 20¢ per pound with a minimum charge of \$50.00. The truck companies are not required to unload shipments—so, if you will need help unloading your shipment, please have us specify "inside delivery." When "inside delivery" is specified, the truck company will send along another person to help the driver unload and the minimum additional charge for this service is \$25.00. If you would like an exact quote, we will be happy to provide you with a written delivered quotation. Please FAX or write your request for a delivered quotation. Please indicate if you need to be called **before delivery** and give us your phone number. If your order totals **\$750.00 or more (excluding items marked F.O.B. Factory)** and is shipped to a single location, we will ship it **FREE** in the Continental United States. Shipments to Alaska, Hawaii, Puerto Rico and Canada are excluded. The "F.O.B. Factory" items are marked with an asterisk (*) and are primarily large playground items and a few furniture pieces.

ASSEMBLY:

All items come with complete, easy-to-understand assembly instructions. If your facility has maintenance personnel on staff, they should be able to install the equipment. Many churches and day cares have an "assembly party" with the parents erecting the item on a weekend (usually furnishing soft drinks and pizza). Also, landscape companies who are used to putting up decks and gazebos can install the items. All vertical parts must be embedded in concrete. We recommend that all playground equipment be installed over a soft, resilient surface to cushion accidental falls. Our catalog pictures show chunks of tree bark under the equipment and "EZ Fall 7" shock absorbing safety matting is shown on page 39.

SAFETY:

Our equipment follows all of the Consumer Product Safety Commission Guidelines in form and function. The C.P.S.C. has free booklets to help educate the public. Just call 1-800-638-2772 and request "PLAY HAPPY, PLAY SAFELY" and "A HANDBOOK FOR PUBLIC PLAYGROUND SAFETY, VOLUME I." Well-designed equipment, properly installed and maintained, informed supervisors, and good play habits are all necessary to make play the safe, healthy, growing experience it should be.

METAL, PINE OR REDWOOD?

We offer equipment made from metal, pine, and redwood. The choice of what material to pick is really a matter of personal preference. However, in dry desert areas, pine cannot be used; only redwood will hold its moisture against the heat. Also, in such areas, redwood is preferable to metal as it is not "hot" to the touch. On the other hand, in areas that get extreme cold in the winter, wood is more desirable than metal as it is "warmer" to the touch. In sunny, hot areas, we suggest pieces with shade roofs and plastic slides instead of metal slides.

WANT A SPECIAL UNIT?

We are happy to modify any of our standard structures to your specifications: add a roof, change a panel, or slide—just let us know. Also, most pieces can be modified with special bases for surface mounting on roof tops or indoor spaces. We'll even be happy to design a piece from scratch.

HOW DO YOU REMEMBER YOUR TEACHERS and STAFF?

GOD MADE TEACHERS

who teach by their deeds
and by what they say.
Who help students learn truth,
to choose right from wrong,
to embrace wisdom,
and to grow in understanding,
By being for them a living lesson
from God's textbook of life.

*"Study to show thyself approved unto God."
II Timothy 2:15*

You unselfishly give
your all to any task
large or small. You
work quietly behind the scene
and often your efforts go unseen.
Others may miss your faithfulness
and fail to show their thankfulness.
But, God sees every little detail
and will reward you without fail.

Your hard work His
favor has won
and you'll surely
hear His "well done".

*"Well done good and faithful servant
enter into thy master's reward"
Matt. 25:21*
